MILK FACTS

1 Did you know that Jersey Milk is good for us? In fact, it's more effective than water for rehydration!

2 Jersey Milk is beneficial for the development of healthy teeth and bones. It contains more protein and calcium than milk from other breeds of cows!

4 Drinking Jersey Milk encourages a healthy mind! The B vitamins it contains support healthy brain function and cell metabolism, it can even help regulate sleep.

5 Did you know that Jersey Milk helps to build muscle because of its high protein content? A small glass has as much potassium as a banana.

3 More people can drink Jersey Milk than other brands. It contains mostly 'A2' protein, which is easier on the digestive system. This can be beneficial in cases of lactose intolerance.

Jersey Dairy is farmer-owned. They ensure that Jersey Cows enjoy a free-range lifestyle and are out to pasture for much of the year.
