Level 2

# Skills Jersey Employability Sessions Overview

## Educational Projects/Sessions

Students will undertake educational projects with professional partners developing skills required for the working world and adulthood such as:

- critical thinking & reasoning
- problem solving
- creativity
- communication
- team-working
- strengthening of identity
- resilience
- emotional intelligence

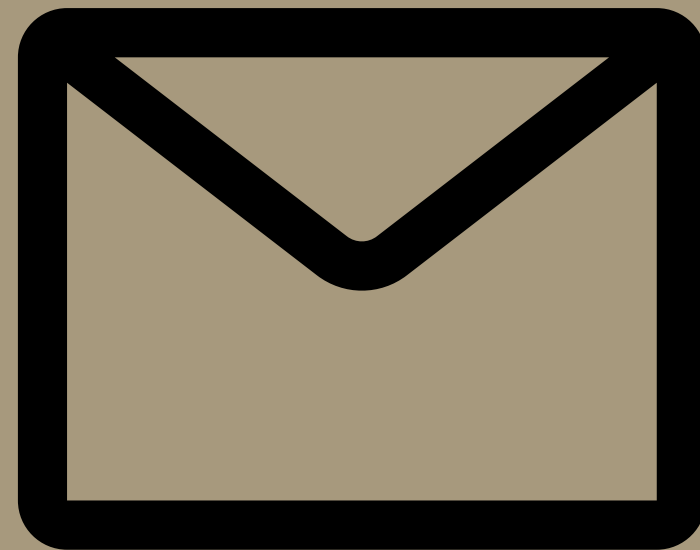

## Industry Insights

Students will undertake industry insights with a broad range of industry sectors in the island, and will additionally complete related exercises and activities during these visits in order to gain greater awareness of the function of the sector and roles available. These activities will also provide opportunity to continue development of the core skills identified
